Information to Customers Ordering from this Catalogue

Cash with order. Please send remittance with the order sufficient to cover the whole bill. Remittances should be made by Post-Office Money Order, Drafts on Philadelphia or New York Banks, or Express Money Orders. We disclaim all responsibility when remittances are not made as above directed. Where it is not possible to obtain these, the letter should be registered.

Seeds postpaid. At prices quoted in this catalogue, we pay the postage on all orders for ounces and quarter-pounds. Where larger quantity than quarter-pound is ordered, postage must be added at the rate of eight cents per pound, unless the goods are to be sent by freight or express, in which case the purchaser always pays the transportation charges when obtaining goods from railroad or express agent. If Beans and Peas are wanted by mail, add postage at the rate of fifteen cents per quart, and for Sweet Corn add ten cents per quart to prices quoted herein.

Non-warranty. While we take every precaution to have our seeds pure and of the best quality, we do not give any warranty, express or implied, either as to quality, productiveness, or any other condition, and will not be in any way responsible for the crop. Every order for articles named in this catalogue will be accepted on these conditions only.

Deutsche Correspondenten. — Alle Bestellungen und Correspondenzen in Deutscher Sprache werden mit Sorgfalt ausgeführt.

Special low express rates. As seeds are now taken, when packed in boxes or bags, by leading express companies at a reduction of twenty per cent. from regular merchandise rates, it is a great advantage to those ordering in quantities, such as pounds and quarts, to have their orders shipped by express. Large quantities can be shipped cheapest by freight, but require a longer time in transit. If the manner of shipment is left to us, we will always use our best judgment in the matter and decide to the interest of the customer.

Packing. No charge is made for boxes or packing, nor for delivery to freight depots or express offices in Philadelphia.

Plant Department. Our nurseries cover over two hundred acres, more than ten acres of which are covered by modern greenhouses. We grow and supply large quantities of Palms, Ferns, and other decorative plants, such as Roses, Dahlias, Cannas, Geraniums, and other bedding plants, also old-fashioned Hardy Flowers. These are fully described in our *Garden Book for 1911*, a copy of which will be mailed free if you are interested.

It is the best paying onion that is grown for general crop. Oz., 15 cts.; $\frac{1}{4}$ lb., 40 cts.; lb., \$1.35; 5 lbs. or more at \$1.25 per lb.

Southport Yellow Globe. A large globular shaped yellow variety, very productive, of mild flavor. This is also a favorite variety with the onion growers, and is planted in large quantities each year. Oz., 15 cts.; $\frac{1}{4}$ lb., 45 cts.; lb., \$1.50.

Ailsa Craig. A large oval-shaped yellow, or straw-colored onion, which is a strong competitor to "Prizetaker." The flesh is very mild and onions keep as well as other large varieties. Oz., 30 cts.; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

Australian Yellow Globe. This extra early variety of onion originally came from Australia. It is a beautiful globe-shape and quite attractive and a splendid keeper. This is a good variety for shipping to distant markets. Oz., 15 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.75.

PEPPER PLANTS. (Page 25).

Dreer's Selected Garden Peas—Ger. Erbsen.

Market gardeners should secure their Peas for planting this spring at once, as the supply is very limited. This condition is due to the drought in the Pea growing districts last summer, which began about the middle of June and continued for a long time, damaging the crops to such a large extent that in many instances the yields did not equal the quantity of seed originally planted.

If Peas are wanted sent by mail, add 15 cents per quart for postage.

Petunia.

Our Riverton grown strain of Double and Single Fringed Petunia have long been celebrated as the best on the market. We keep continually culling out and hybridizing and thus maintain the high standard. We frequently test stocks from the world's best growers and can say, without fear of contradiction, that our own strain is by far the best to be had at any price.

Note.—We would especially call the attention of every one who grows Double Petunias from seed that all the smallest and weakest seedlings should be saved, as they usually produce the finest double flowers. The same is true of the singles, the strong seedlings being inclined to "weediness."

Space will not permit our showing and describing all of the "Planet Jr." tools, but we will send a fully illustrated catalogue, *free for the asking*, to any who desire it, and we can supply promptly anything ordered. "Planet Jr." goods are standard machines—the best on the market. In sending your order to us, you can rely on getting bottom prices.

Planet Jr. No. 4 Combined Seed Drill, Single Wheel Hoe, Cultivator and Plow

Price, \$10.50
As a Seeder only, \$8.50

This tool combines in a single implement a hill-dropping seeder, a continuous row seeder, a single-wheel hoe, a cultivator and a plow. It sows in continuous rows or drops in hills, 4, 6, 8, 12 or 24 inches apart. It is automatically thrown out of gear and the feed stopped by raising the handles. For use as a cultivator, the drill parts are removed and the tool frame substituted by taking out a single bolt, it is then a perfect single-wheel hoe, with a variety of tools.

No. 25 Planet Jr. Combined Hill and Drill Seeder and Double Wheel Hoe, Cultivator and Plow

Price, \$13.00

This new combined machine is intended for gardeners who have a large enough acreage in crops for a Double Wheel Hoe to be used to good advantage, and yet prefer not to buy seeders and wheel hoes separately.

As a seeder it is practically the same as Planet Jr. No. 4; will sow in drills any thickness or drop in hills 4, 6, 8, 12 or 24 inches apart, and has the same feed, hill dropping mechanism, and automatic device for stopping the feed, and has also the new seed index. It is thoroughly substantial and is accurate in planting all kinds of garden seeds in either hills or drills.

Planet Jr. No. 17, Single Wheel Hoe, Cultivator and Plow

Price, \$4.50

STEEL FRAME

No. 17. Wheel Hoe is suited to all kinds of garden cultivation and all garden crops. You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

- Other attachments can be added at any time.
- No. 16. With plow, two hoes, three cultivator teeth, two rakes and leaf lifter \$5 35
 - No. 17½. With two hoes and three teeth 4 00
 - No. 18. With 6-inch hoes only 3 00

Planet Jr. No. 3 Hill and Drill Seeder

Price, \$10.00

This drill will sow in a continuous row in the ordinary way with the greatest regularity, but its distinctive feature is that it will drop neatly in hills either 4, 6, 8, 12 or 24 inches apart. It is changed in a moment from hill to drill work; the plow is adjustable for depth and opens a very narrow furrow. Capacity two and one-half quarts.

Planet Jr. No. 12 Double-Wheel Hoe, Cultivator and Plow

Price, \$6.50

STEEL FRAME

Two acres a day can easily be worked with this implement, and when it is done it will be a better job than three men could have done in the same time with hand hoes, and runs either astride or between the rows.

The No. 12 has a pair of 6-inch hoes, a pair of plows for opening or covering, and a set of 4, all steel cultivator teeth. The tools shown are what gardeners use most, and others can be added as wanted.

No. 13. Same tool as No. 12, but with only one pair 6-in. hoes, \$4.25

No. 14 Planet Jr. Double Wheel Disc Hoe, Cultivator and Plow

Price, with Attachments as in cut, \$7.50

STEEL FRAME

This new tool will give excellent satisfaction; is especially pleasing to all who work peat lands. There are three oil tempered discs on each side.

The set of prong cultivator teeth are constructed on entirely new lines, and will be found invaluable in general cultivation.

The plows are the regular Planet Jr. model and are continually valuable for furrowing, covering and plowing.

"Fire-Fly" Hand Plow

Invaluable for use in small gardens. Moldboard of tempered and polished steel. The depth is easily and quickly changed. Very useful to plow up chicken yards, \$2.25.

Planet Jr. Twelve-Tooth Harrow, Cultivator and Pulverizer

Price, \$8.50
 Less Pulverizer, \$6.90
 Less Wheel and Pulverizer, \$5.70

— Gardeners cultivate better than formerly. It has been found to pay best. The farmer or gardener is most likely to cultivate best who has the tool best adapted to his purpose. With the Twelve-Tooth Harrow here shown you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil, and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a special favorite with strawberry growers, market gardeners and truckers.

Planet Jr. No. 8 Horse Hoe and Cultivator

Price, \$8.50
 Without Depth Regulator
 order as No. 7
 \$8.00

Planet Jr. Combined Horse Hoe and Cultivator. Is light and easy to handle. It opens and closes furrows, hoes right up to the plants without danger of injuring, throws dirt to or from the row and throws back from center again. Cultivates to any depth desired and adjusts for any width. Every part is perfected to make the tool acceptable to the intelligent farmer who knows the best is always the cheapest.

Price, Double, \$15.50
 Packed weight, 87 lbs.

Price, Single,
 \$12.50
 Packed weight, 67 lbs.

CELERY HILLERS are now considered indispensable. The leaf lifters are adjustable in height and are especially valuable for first workings. With their aid some of our best and largest growers hill their celery **without any "handling."** Equipped with lever expanders and leaf lifters. The double hiller only is fitted with lever wheel. The hilling blades are 43 inches long, adjustable in width or height as wanted; the double machine works all rows up to four feet apart. The single works all widths, and where market gardeners plant close and first bleach every other row, it is "just the thing." Before hilling, the soil should be thoroughly loosened with a horse hoe.

No. 76 Planet Jr. Pivot Wheel Riding Cultivator, Plow, Furrower and Ridger

The No. 76 is a new implement which combines in itself nearly all the advantages of our other riding cultivators. The combination of the best parts of these tools in one would seem to us to make a machine which would be without a rival in popularity and usefulness. The arch is high, frame and tongue are of steel and the change in width of the wheels is all that could be desired. It has new and powerful levers, and the gang frame is stronger than any we have before offered. The standards are adjustable for depth, and to throw to or from the row as desired. The extra wide arch is very desirable. The draft is arranged to insure satisfactory work in all conditions of soil. We look for a wide sale for this tool as soon as known.

The pivot wheels act instantly and make the guiding a pleasure.

The seat is large and comfortable, adjustable up and down, back and forth.

Construction. All steel or malleable but the singletrees.

No. 72 Planet Jr. Two-Row Pivot Wheel Cultivator, Plow, Furrower and Ridger

Equipment: Fourteen cultivator teeth; four reversible plows; two 7-inch furrowing shovels; four plant guards.

We have found a demand for these tools because they do thorough work in rows of irregular width.

With the improved No. 72 we complete the cultivation of two rows at one passage, at all widths from 28 to 44 inches inclusive, and the implement is especially built to do this when the rows are irregular. This tool is so designed that the operator can make changes in width of gangs instantly while in motion, by means of a handy lever for each gang, so as to accommodate the machine perfectly to rows which vary greatly in width. The wheels and gangs can be easily changed for crops planted different widths apart.

In checkrows: Checkrowed crops are usually planted with two-row seeders, and therefore with this tool the gang working between the two rows need not be changed from one end of the row to the other, so that the driver has but one lever to handle.
